

## Principal's Message

It is our great pleasure and privilege to welcome the thirteen batch of students of AKMMC to be admitted in the 2020-2021 session. AKMMC batch 1,2,3,4,5,6 have passed the final professional examination & became doctor. Batches 1,2,3, 4,5 have already completed their internship and batch 6/7 is undergoing their internship program. AKMMC celebrated decade of excellence in quality medical education this year and also the AKMMC day on 14th September 2018 which was attended by Minister, Dignitaries, Doctors, Students & Media People.

AKMMC has become a leader in undergraduate medical education in Bangladesh. It is because of the full-time academic faculty, rigid academic programs and adequate hospital facilities. Newer facilities are constantly being added.

I expect the new batch of students will use these facilities and eventually become a competent doctor. They will be able to serve the community, suffering humanity as expected, both at home and abroad.

One should know that, nothing can be taught, but everything can be learned. Therefore, students should have active learning. Spoon feeding in the long run teaches us nothing but the shape of the spoon. Pass in the professional examinations is directly proportional to the increased percentage of attendance in the classes.

We appreciate and acknowledge continued support from the medical education & family welfare division of Ministry of Health, DGHS, Dhaka University, BMDC, guardians and dignitaries. We promise to establish an institution to exert excellence in medical education, training & medicare services of national and international standard in the country.

Allah Hafez.

**Prof. Dr. Md. Ekhlasur Rahman**  
Principal  
Anwer Khan Modern Medical College
