

Vice Principal's Message

It is my great pleasure and happiness to welcome the students of thirteenth batch of Anwer Khan Modern Medical College (AKMMC) to be admitted in the session of 2020-2021. It is indeed very gratifying and pleasant to watch the success of the previous years of AKMMC. This is one of the unique medical college in the private sector in our country.

This institute has full time dedicated, qualified and efficient faculty with great commitment to provide top class medical education. We are dedicated to produce good quality devoted and competent doctors to serve in the health system with adequate knowledge, skill and attitude. Apart from strong basic, para-clinical and clinical departments, we have unique infrastructure, well organized departments, enriched library and separate hostel for male and female students. Newer facility is constantly being added. In addition to regular classes, seminars, symposia, CME programs etc. are arranged on regular basis to update knowledge and share experiences. I hope that, students of new batch will avail these facilities and gain much knowledge, clinical skills with dedication and sincerity.

Our academic record is one of the best among all the medical colleges in Bangladesh. I expect the students of new batch will use all the facilities and become a good, competent, empathetic doctor. They will be able to serve the people at home and abroad. Allah Hafez.
